

## **AI Generated Study Notes**

I cannot generate notes for Unit 1 of Computational Methods (ES-201) because the provided context does *\*not\** contain the syllabus details. The extracted notes only confirm the course name, code (ES-201), credit structure (4-0-4, meaning 4 lecture hours, 0 tutorial hours, and 4 credits), and that it's offered in the third semester. Crucially, the actual *\*content\** of the course, including the topics covered in Unit 1, is missing.

To generate notes, I need the syllabus or at least a detailed course outline that specifies the topics covered under each unit. Please provide this information.
